Yasushi **Yamazoe**, Ph.D.

Professor,
Division of Drug Metabolism and Molecular Toxicology,
Faculty of Pharmaceutical Sciences,
Tohoku University
Aramaki-Aoba, Aoba-ku, Sendai 980-8578
Tel: +81-22-217-6827 Fax: +81-22-217-6826
Email: yamazoe@mail.cc.tohoku.ac.jp

Field of expertise: drug metabolism, genetic polymorphism of drug-metabolizing enzymes, carcinogenesis

"Research projects" (source: http://www.pharm.tohoku.ac.jp/english/informE/eisei-ind.html):

- Expression and Regulation of Drug-Metabolizing Enzymes (genes)
- Analysis of Genetic Polymorphism in Human Drug Metabolism
- Metabolic Activation of Genotoxic Compounds
- Immunotoxicology of Drug-Induced Liver Injury: Role of Cytokines in Growth and Metastasis of Tumor Cells
- Application of Liposomes on Tumor Chemotherapy

Note: Attached is his publication list I could come up with through the PubMed search. The list is limited to the publications from 1987 to date, and also to his affiliations that I know (Tohoku Univ.: 20 publications, pages 1-3; Keio Univ.: 73 publications, pages 4-14). I would assume that Dr. Yamazoe has more publications than the 93 listed in total.
